Control Programming LLC
Release Notes

Driver – Control Programming LLC License Manager - Cloud
version 4.0.3

Extension

This release note is for the License Manager that is required to properly license all 2.x and above extensions/drivers.

Notes and Recommendations

Drivers->License Manager->Control Programming LLC->License Manager

System Requirements and Dependencies

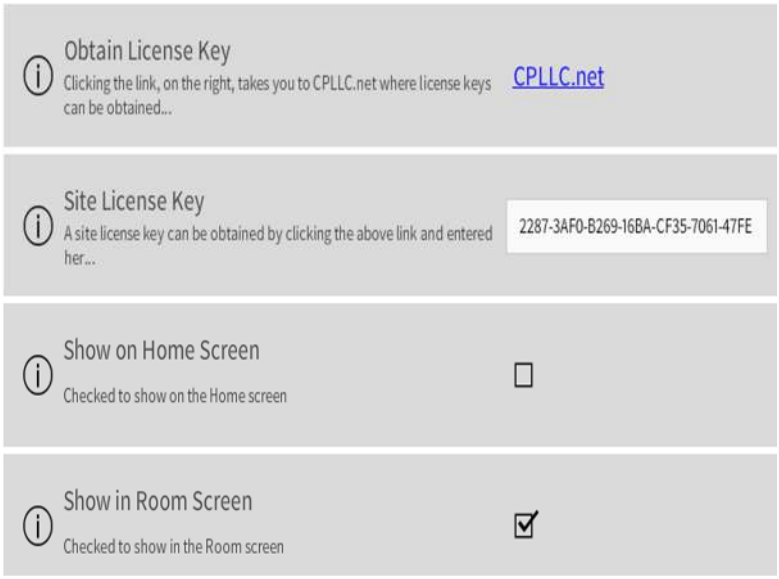
Provide any minimum versions of applications required to run your driver.

- Crestron Home v4.04

Installation/Upgrade Instructions

Installation and dealer-facing configuration instructions.

Installer Options



Obtains License Key – clicking on CPLLC.net will bring up the website from which license keys can be obtained.

Site License Key – place to insert the Site license if one is used

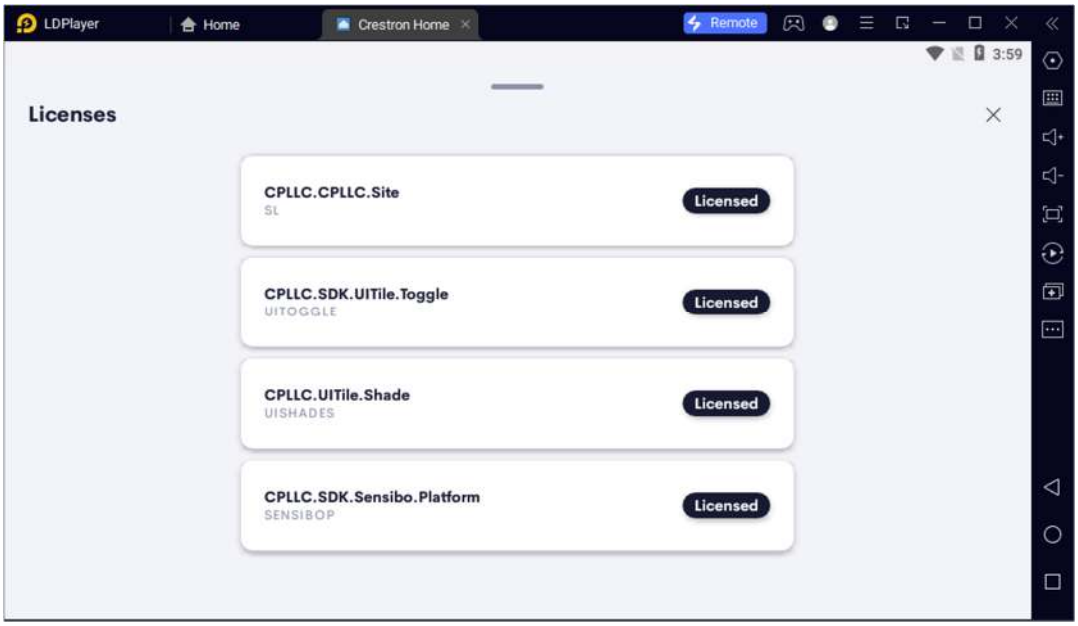
Visible on Home Page – checked if extension is displayed on home screen

Visible on Room Page – checked if extension is displayed on room screen

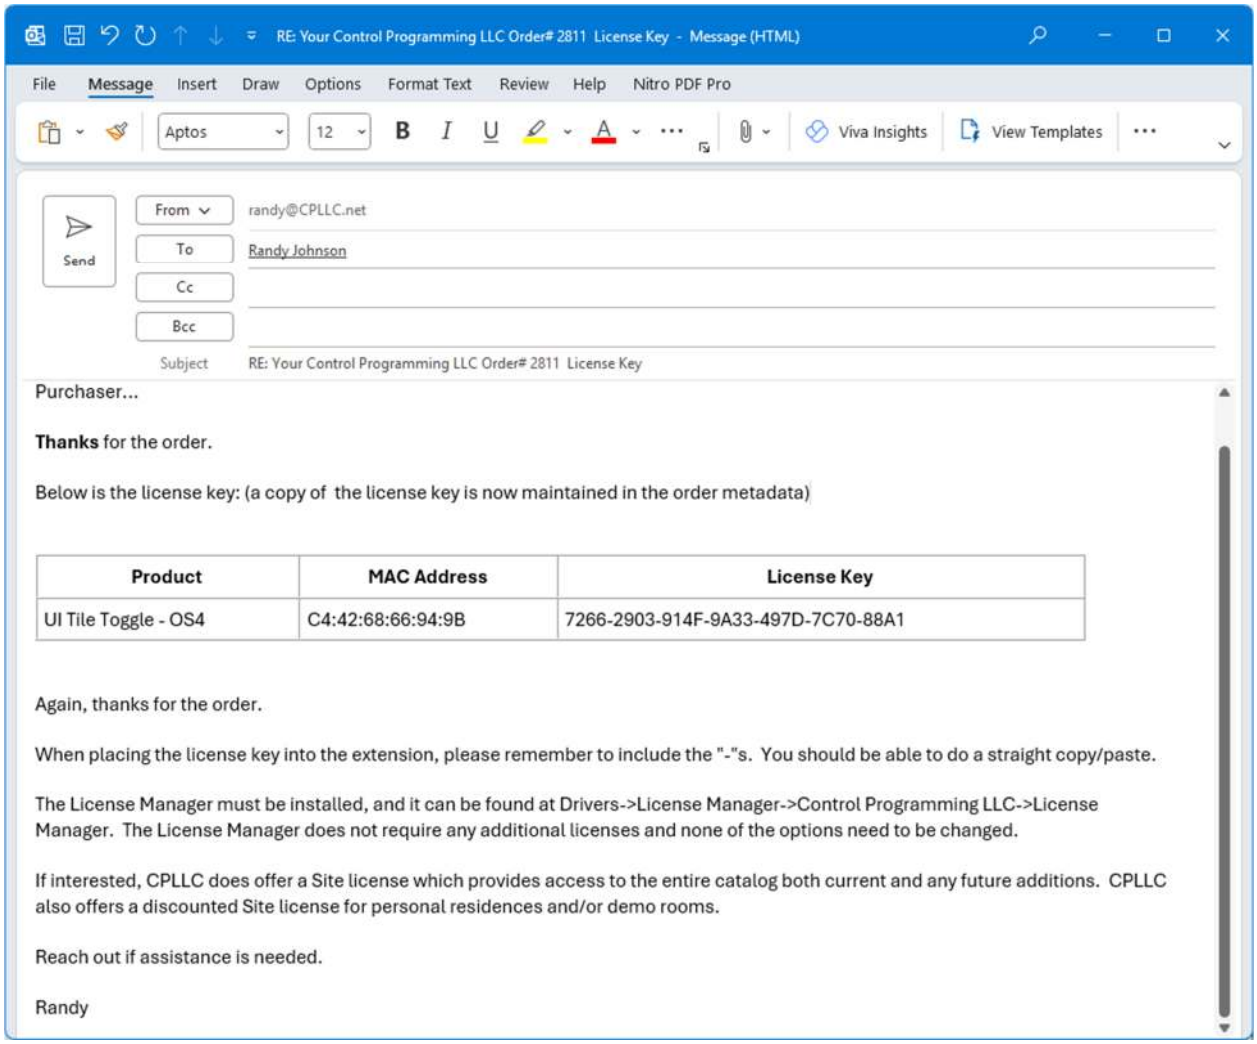
CPLLC recommends buying a Site License as it will simplify your license management and is cost certain.

End-User Experience

On the home/room page the license manager will provide feedback as to the license status of the extensions/driver. The green dot indicates all extensions/drivers are licensed. The red exclamation point indicates one or more extensions/drivers are not licensed. Touching the tile will bring up a list of installed extensions/drivers SKUs as well as their license status.



The above screen shows a list of installed CPLLC extensions/drivers sorted by their SKU. Each entry will say Licensed or Not Licensed depending on the state.



When a license key is acquired and paid for, you will receive an email as shown above with your license key. All license keys need to be copied into the extension complete with “-“s.

Limitations/Known Issues

No know limitations.

Supported Features

This extension provides support for License key management in Crestron Home.

Test Environment

List the environments where this driver has been tested and any control system firmware versions used.

- Crestron Home v3.013

Supported Models
