

# Control Programming LLC

## Release Notes

Platform – YeeLightPro - Platform - TCP  
version 4.0

### Extension

---

This release note is for the CPLLC Kasa Platform Extension. YeeLightPro is a LAN control of various IoT devices via their Wi-Fi /Bluetooth connections and is described <https://en.yeelight.com/yeelight-pro/>.

### Notes and Recommendations

---

All YeeLightPro devices need to be acquired and setup using the YeeLightPro mobile app. The extension will obtain a list of devices associated with a given YeeLightPro gateway.

This extension uses the YeeLightPro protocol and will need LAN access to function.

Drivers->Platform->YeeLightPro->Gateway

Since a platform extension does not have a UI, any issues (i.e. invalid token, invalid IP address) will be documented in the error log. If no sub extensions are created an error was encountered.

### System Requirements and Dependencies

---

- Crestron Home v4.0
- SDK 22+
- This extension requires that the License Manager (<https://cpllc.net/product/license-manager/>) also be installed on the processor.

# Operation Installation/Upgrade Instructions

**Configure 'YeeLightPro'**

Please enter TCP/IP settings:

TCP/IP settings	Value
IP Address/Hostname	10.2.178.37
IP Port	65443

## Platform Installer Options

**IP Address** – IP address of the YeeLightPro Gateway.

**IP Port** – leave set as is

**Installation Settings**

**Obtain License Key**

Clicking the link, on the right, takes you to CPLL.net where license keys can be obtained. A purchased license key is required to be entered into the License Manager extension for each installed CP... [CPLL.net](https://cpllc.net)

**Enter License Key**

A purchased license key must be obtained by clicking the above link and entered here. The extension will function 100% without a license key for 2 hours.

**Obtain License Key** – clicking on the “CPLL.net” link will take you to the website to purchase the necessary license.

**License Key** – this extension requires a paid license key which can be obtained from <https://cpllc.net/product/yee-lighting-pro-platform-sdk/>. For testing purposes, this extension will function 100% for 2 hours. Rebooting will reset the two hours. |

## Installation Settings

① Obtain License Key

Clicking the link, on the right, takes you to CPLLC.net where license keys can be obtained. A purchased license key is required to be entered into the License Manager extension for each installed CP...

[CPLLC.net](http://CPLLC.net)

① Enter License Key

A purchased license key must be obtained by clicking the above link and entered here. The extension will function 100% without a license key for 2 hours.

As a reminder the License Manager must also be installed.
